
Buffalo Extraction Systems partners with Malva S.A. to strengthen their presence and services across Greece.

3rd August, 2021

Malva S.A. has been an industry leader in providing solutions for the lab-dependent industries and academia for 30 years in the regional Balkan market and beyond.

Malva S.A. leads the Life Sciences market with the necessary industrial and scientific expertise that add meaningful impact to science and society, having successfully delivered numerous large projects in Mass Spectrometry, Chromatography Networks, Molecular Diagnostics, Laboratory Expansions, Thermal Analysis, Material Science, Pharmaceutical Production, Proteomics and, recently, Genomics, to name a few.

As a partner to Buffalo Extraction Systems, Malva S.A. will provide their distribution, marketing and regional expertise to help generate value for Greece's booming Pharmaceutical Cannabis Industry.

Speaking on the occasion of this announcement, Co-founder and CEO Bhavin Panchal shared, "Malva is an industry leader in Greece with its decades of experience in delivering solutions and support with the highest levels of compliance. We at Buffalo Extraction Systems look forward to bringing our consulting, research and expertise in extraction and industrial solutions to offer cutting-edge solutions to Greece's Cannabis and Hemp Industry."

Buffalo Extraction Systems and Malva S.A. will work closely to serve the regulated analytical and quality control laboratories and academia in Greece.

About Buffalo Extraction Systems

Buffalo Extraction Systems is a sister concern of Cybernetik Technologies (<http://www.cybernetik.com>), a 30 year old automation company that has been manufacturing high end material handling and process automation solutions for multinationals such as Hershey's, GSK, Novartis, Mondelez, and Mars International.

As a turnkey solutions provider, Buffalo Extraction Systems supply customized Cryogenic Ethanol Extraction and Supercritical Carbon dioxide (CO₂) Extraction systems for Hemp/Cannabis extraction. Committed to navigating its clients through the nitty-gritty of the extraction process, from concept to commissioning, Buffalo Extraction Systems provides process consultation, GMP compliance and documentation, complete system automation and handholding with local service and spares.
